

Science is the field which is an origin of various theories, inventions and innovations. Throwing light upon one such field of science, Science Association committee and literary association committee President Science College organized an interactive session for students of biological sciences on 8th Oct.2022. The guest speaker was Dr.Umashankar Singh Associate professor, Department of biological engineering, IIT, Gandhinagar. The session was titled “The challenges and opportunities for modern student of biology” The session was headed with welcome speech delivered by principal ma’am followed by the technical session which engaged students effectively. The questionnaire session made students into interaction and opened their dimension of knowledge with their doubts and solutions. This successful event was concluded by Vote of thanks, to all the contributors who have been the part of this Fruitful event.
