

SHAYONA
PRESIDENT SCIENCE COLLEGE

President Science College has arranged 3 days of lecture series for BSc student from 1st August to 4th August.

On 1st August, Dr. Rashi Jain has conducted an expert talk on “Vector-Borne Threats: An Interdisciplinary Lens on Global Prevention Strategies”. She delivered a deeply insightful talk focusing on malaria and dengue.

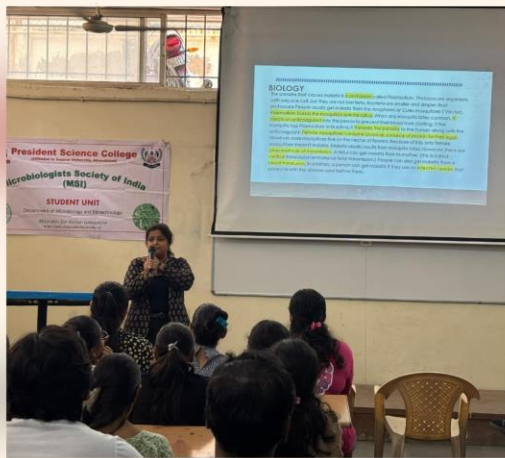

On 2nd August, brief informative seminar was organized on “GPSC/UPSC Preparation Guidance”, aimed at informing students about civil services exams and preparation strategies. The session was delivered by Mr. Hari Barot, a mentor from Chahal Academy.

On 4th August, An expert session was organized on the topic “Pillars of Leadership” as part of the Indian Knowledge System (IKS) subject. The session highlighted the traditional Bharatiya perspective on leadership, rooted in Dharma, Karma, Integrity, Self-discipline, and Collective Welfare. The expert speaker emphasized timeless values drawn from ancient texts such as the Bhagavad Gita, Manusmriti, and Arthashastra, linking them with modern leadership challenges.

Students were introduced to the IKS view of leadership as a selfless, dharmic responsibility rather than a position of power.

Student was actively remaining present in all three days and they learned so many new things. We are very much thankful to all the speakers for sharing their knowledge over here.

Here are the glimpses of event.
