Academic Laboratory Visit to Neuberg Supratech Reference Laboratories

President Science College organized an academic laboratory visit for undergraduate students of B.Sc. (Hons.) Microbiology and Biotechnology to Neuberg Supratech Reference Laboratories, Ahmedabad, on 7th February 2026. A total of 32 students, accompanied by faculty member *viz.* Dr. Priya Kumari, under the guidance of respected principal Dr. Jaivik Shah, participated in the visit. The visit was thoughtfully organized to provide students with valuable exposure to advanced diagnostic techniques and real-time laboratory practices, thereby strengthening their practical understanding of life sciences beyond classroom learning.

During the visit, students explored key departments including Microbiology, Molecular Infectious Microbiology, Histopathology, Immunology, Biochemistry, LCMS, and Hematology. They observed advanced diagnostic instruments, automated systems, and stringent biosafety protocols followed in a professional clinical laboratory setup. The interactive guidance provided by laboratory experts such as Ms. Ankita Murnal (Research Associate-SBRL) helped students connect theoretical concepts to real-time diagnostic applications and modern biomedical technologies.

The visit was both intellectually enriching and professionally inspiring. It provided students with practical exposure beyond classroom learning, strengthened their conceptual clarity, and motivated them toward research excellence and clinical proficiency in the field of life sciences.
